

Hepatitis Outbreak!

Hepatitis A is a highly contagious infection which may result in symptoms ranging from a mild illness to a serious condition requiring hospitalization, or in rare cases, death.

Public health warnings and news reports about the national Hepatitis A outbreak have been a frequent topic in the media. Over 600 cases have been diagnosed in Michigan in the last year.

Come to Our Next Healthy Hints to Learn:

- The risks of contracting Hepatitis A
- How to protect yourself and those around you
- How to recognize the symptoms
